

DID YOU KNOW

IRL scientists have received more scientific and engineering awards and accolades on a per-employee basis than any other industrial research organisation in New Zealand.

IRL scientists and engineers are consistently recognised by the Royal Society of New Zealand and other authoritative organisations with medals and awards recognising the significant contribution they have made to science, engineering and more specifically to New Zealand industry.

In addition, IRL's Chief Executive has been acknowledged by the Royal Society for outstanding leadership in science management and in connecting science and business for the benefit of New Zealand.

WHAT DOES THIS MEAN?

IRL's honours and accolades for science and engineering excellence provide independent confirmation of the high standards and depth of scientific and engineering knowledge within the organisation.

A number of IRL scientists and engineers are international leaders in their respective fields, which provides New Zealand industries with a distinct advantage in being able to utilise these recognised skills to enhance and grow businesses.

IRL scientists and engineers understand the scientific development needs of industry. They are dedicated to using their experience and expertise to drive business growth which, in turn, will generate long-term economic value for New Zealand.
